

A message from Editor-in-Chief

Dear statistics community:

It is a great pleasure for me to make available to you the second number of Volume 5 of 2014 of the Chilean Journal of Statistics, published by the Chilean Statistical Society. Six papers are included in this issue. These papers cover the following topics: Modeling Bounded Outcome Scores, Multistate Models, Survival models, Sampling Theory and Distribution Theory. I would like to thank the researchers and internationally renowned statisticians who have honored us by choosing our young journal to publish some of their research. I would like to thank the collaboration of several referees, whose excellent and anonymous work have made possible the publication of this issue.

Best regards to all,
Manuel Galea
Editor-in-Chief
Chilean Journal of Statistics
